of Ocean Science  
2030 for Sustainable Development

# 2024 OCEAN DECADE CONFERENCE

*SATELLITE EVENT*

The European Blue Schools  
toward the ambitious target  
of UNESCO about ocean  
literacy in the school  
curricula.

**Monday April, 8**  
**17:00-18:30h**

**Institut de Ciències del Mar (ICM-CSIC)**  
**Sala d'Actes Ramon Margalef**  
Pg. Marítim de la Barceloneta, 37, 08003 Barcelona

**The SHORE, ProBleu and BlueLightS Consortia Coalition, in collaboration with EMSEA, propose a dialogue toward a common commitment to ocean literacy by engaging the Network of European Blue Schools. To bring ocean literacy to life in school curricula by 2025, the projects promote the European Blue Schools Statement about the direct involvement of countries of the Mediterranean, Atlantic and Baltic basins covered by them in the UNESCO goal implementation.**

The coalition will promote the engagement with actions of local stakeholders for a successful implementation of the IOC/UNESCO goal in the framework of the EU Mission and its lighthouses, contributing to the Education for Sustainable Development (ESD) objectives.

**Don't miss this opportunity to contribute to a sustainable future, capped off with a networking session to connect with like-minded people!**
